TOP SKILLS

- Product ownership: end-to-end project planning and cross-functional coordination
- Flexible innovation: converting ambiguity into solutions for customer problems
- Full Stack Development: Web/mobile apps, Servers & APIs, Databases design, DevOps, CI/CD
- AI-assisted development: Spec-based development, Copilot, custom agents and skills, local LLMs
- Scalable architecture design following SOLID principles for production software

EXPERIENCE

Software Engineer III, Clozd Inc. | Jan 2022 - May 2026

- Project leader for many large features: AI transcript processing, custom reports, divided business views, etc.
- Advocated for and implemented LLMOps architecture for AI features
- Improved team processes around AI-related bug triaging, prompt testing and deployment, and on-call tasks
- Led cross-functional cooperation on internal tools with stakeholders from various departments
- Awarded "Product MVP" twice for solving complex bugs and leading impactful initiatives
- Technical lead for TypeScript, React, CSS, unit testing, LLMOps, and several product areas

Contracted Software Engineer, Frontline Alternative | Jan 2022 - Dec 2023

- Worked with investor to design a fitness tracking application with fast-food restaurant alerts
- Built a ReactNative app for Android/iOS, with TypeScript server and SQL database

Software Engineering Intern, Nubill | Apr 2021 - Jan 2022

- Designed and created new UI components in Angular
- Implemented frontend testing system. Increased test coverage from 0% to 50%, reduced bug creation rates
- Trained co-workers on testing strategies, establishing company guidelines for future code

Engineering Leader, BYU Family History Tech Lab | Oct 2019 - Jan 2022

- Led a team creating and maintaining React/Angular web apps with thousands of regular users
- Improved app stability by refactoring legacy code with more scalable design patterns
- Improved CI/CD workflows with Github, Terraform, and AWS; reduced production costs

Graphic Designer, Thinkster.io | Jan 2019 - April 2021

- Self-directed to create lead-generating landing pages and marketing graphics
- Practiced Scrum methodologies in weekly sprints and daily standups

Web Developer, SteadyTIDE Marketing | Aug 2011 - Nov 2015

- Worked directly with clients to create custom lead-generating websites
- Developed a mobile app with streaming HypnoTherapy and mindfulness meditations.

EDUCATION

BS in Computer Science, Brigham Young University | Apr 2022

- Built apps, servers, and databases with TypeScript, Python, Java, SQL, etc
- Innovated web and mobile UI/UX designs based on real user research
- Scrum leader for capstone team project, collaborating with multiple stakeholders
- Participated in Mechatronics Club leadership; created first-place maze-solving robot
- Finalist in a student innovation competition for Kneaders
